## October 10<sup>th</sup> 2006 SMPS Meeting

### Strategic Initiatives in Biotechnology

Formed in 2005, Bio Nebraska Life Sciences Association is a Public/Private nonprofit organization dedicated to facilitating the collaboration and expansion of the Life Sciences activity with an underlying goal of promoting economic development in the State.

The growth of the life sciences industry is creating new jobs and additional tax revenue for Nebraska and is supporting the growth of Nebraska's economy. A few areas that Nebraskans are currently working in include pharma/nutraceuticals, bio/medical devices, instruments and equipment, bio/pharma/medical research and development and bio/medical testing and evaluation facilities.

Speaking to us is Julie Karavas, President and a member of the Board of Directors for Bio Nebraska Life Sciences Association. She is a former vice president of Legal Affairs for an agricultural association and has been responsible for corporate operations and public relations for a Lincoln manufacturer. She earned her bachelors degree in International Business from Nebraska Wesleyan University and her JD from the University of Nebraska.
